FEDERAL AVIATION ADMINISTRATION

GENERAL INFORMATION

ABOUT THIS DIRECTORY

The FAA Directory contains six major sections of directory data. They are:

- Washington/Region/Center Headquarters
- Field Facilities
- Regional Area Maps and Organization Charts
- Alphabetical Listing
- Special Interest Groups
- Glossary

The directory shows the Washington headquarters section first. Headquarters data is arranged as follows: Administrator, Deputy Administrator, Assistant Administrators, Associate Administrators (Offices/Services are arranged alphabetically within their Associate Administrator). Region and Center sections follow.

Each regional section begins with the region's organization chart and area map. Two regional subsections follow. The first subsection shows regional headquarters data. The second subsection shows the region's field facilities.

The regional field facility section contains field offices and facilities, sector level and above. It is arranged in alphabetical order by state, city within state, and type of facility within city. The city with which the field facility is associated is listed under the "CITY" column. The associated city name relates to the regional area map. The field facility's physical location is provided under the "LOCATION" Column.

The alphabetical section is a listing of all people identified in the sections described above.

Special Interest Groups contain pertinent information about various aviation associations.

The Glossary gives a brief functional description of various facilities.

The back cover of the directory has been indexed so that any directory segment can be easily located. To use the back cover index, place left thumb on the outer edge of the back cover. To locate the desired entry, fold back the remaining page edges and aline the index edge mark with the appropriate page edge mark.

TELEPHONE NUMBERS

Headquarters Elements

Federal Telecommunications System (FTS) telephone numbers have been used for individuals located at headquarters offices. To place a call from one region or center to another, first dial the local FTS access c (generally 8) followed by the seven digit number.

Field Facilities

Both commercial and FTS telephone numbers are shown for most field facilities. Commercial numbers shou generally be used when calling an office within 50 miles. FTS numbers for field facilities may be "on-net" or "off-net". When only an FTS number is shown, the number is "on-net" and may be dialed direct from another FTS number. Dial the FTS access code (generally 8) followed by the seven digit FTS telehone number.

If an office is NOT on the FTS net, the number of the nearest FTS operator is shown. These numbers are identified by an asterisk following the number. To reach these offices, dial the FTS operator and ask for the commercial number. After obtaining the commercial number, dial the FTS access code (generally 8) followed by the commercial number.

Calls to and from Alaska, Hawaii, and Puerto Rico

Calls (except from Seattle, San Francisco, and Washington, D.C.) must be placed through the locations and FTS operator numbers listed below during weekdays and business hours:

	FTS OPERATOR		
Calls to	Location	Telephone number	Switchboard hours (a.m.-p.m.)
Alaska	Seattle	399-0150	7:30-5:15, P.t.
Honolulu	San Francisco	556-0220	7-5, P.t.
Puerto Rico	Washington, D.C.	967-1221	24 hrs., 7 days

Afterhours and on weekends and holidays, essential calls will be completed by the Washington, D.C., operator. Users in Seattle who wish to call Alaska, in San Francisco who wish to call Hawaii, and in Washington, D.C., who wish to call Puerto Rico should follow dialing instructions in local telephone directories.

Calls to Europe

Procedures for placing long-distance telephone calls to European countries vary from location to location. To place calls to Europe, consult your local directory for calling instructions or seek assistance from your local communications center.

Directory Changes

Changes to the FAA Directory are processed by regional/center FAA Directory representatives. Forward all changes as they occur to the appropriate representative.

Calls to Asia-Pacific

Calls outside of Honolulu must be made using commercial services. Callers must use international procedures to reach offices in Japan, Guam, and America Samoa.

SUGGESTIONS? ADDITIONAL INFORMATION?

Any questions or requests for further information concerning the FAA DIRECTORY should be addressed to the Office of Management Systems (AMS-200). The Office of Management Systems welcomes any comments or suggestions for improving the FAA DIRECTORY.

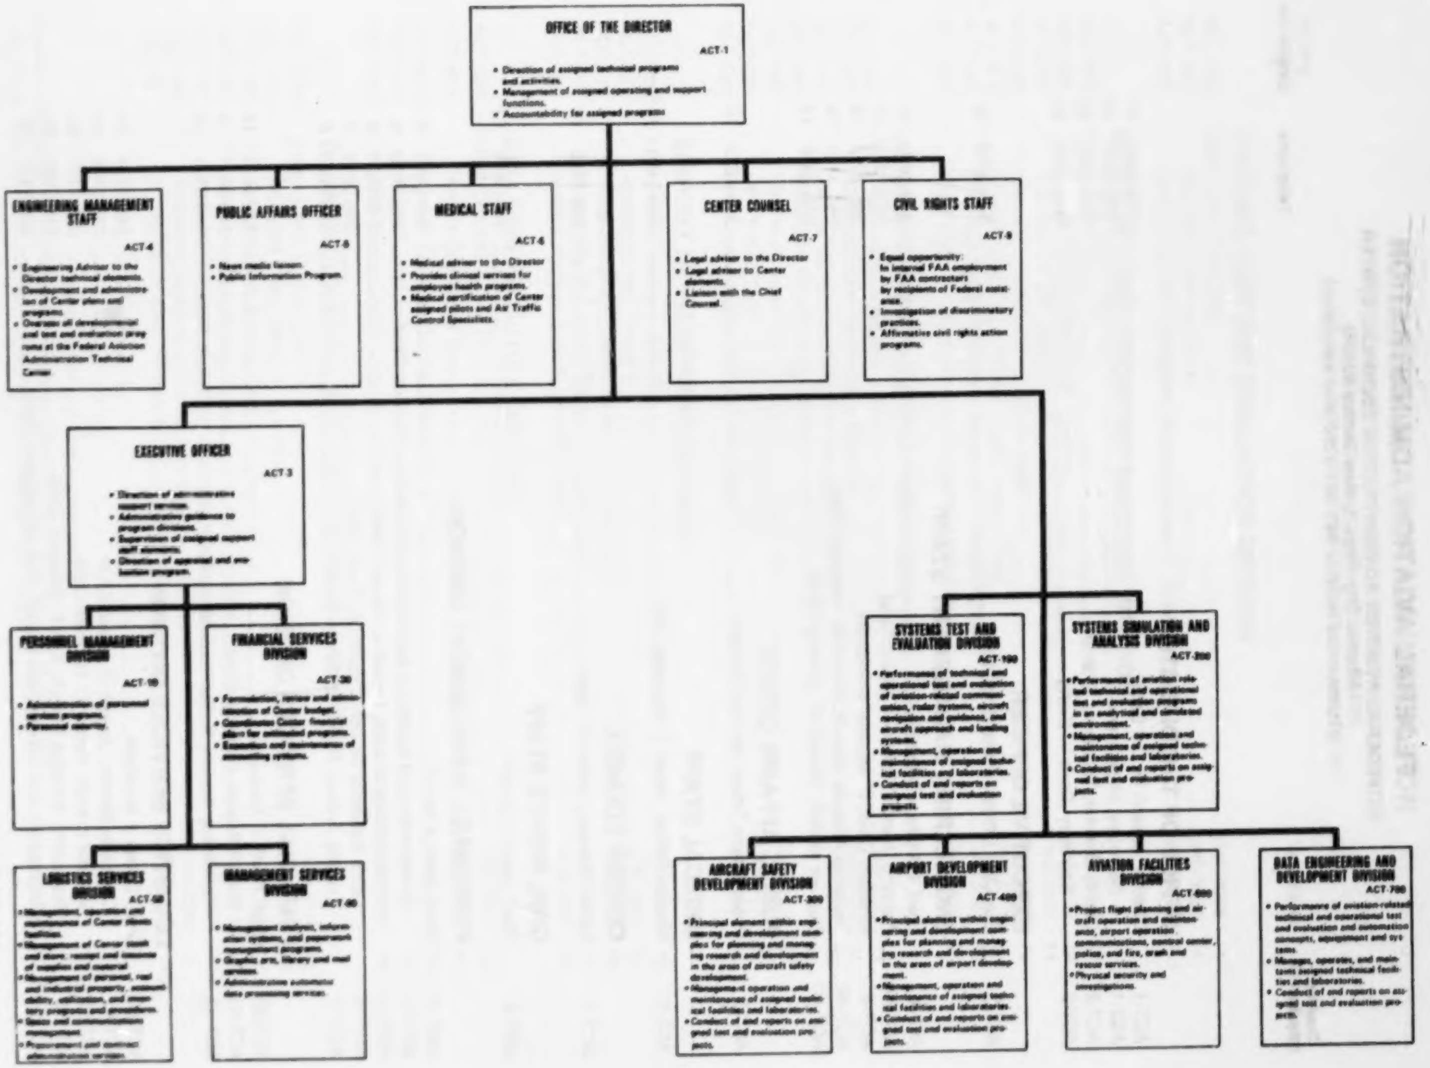
FEDERAL AVIATION ADMINISTRATION TECHNICAL CENTER



OFFICE OF THE DIRECTOR

ACT-1

- Direction of assigned technical programs and activities.
- Management of assigned operating and support functions.
- Accountability for assigned programs

ENGINEERING MANAGEMENT STAFF

ACT-4

- Engineering Advisor to the Director technical elements.
- Development and administration of Center plans and programs.
- Oversees all developmental and test and evaluation programs at the Federal Aviation Administration Technical Center

PUBLIC AFFAIRS OFFICER

ACT-5

- News media liaison.
- Public Information Program.

MEDICAL STAFF

ACT-6

- Medical advisor to the Director
- Provides clinical services for employee health programs.
- Medical certification of Center assigned pilots and Air Traffic Control Specialists.

CENTER COUNSEL

ACT-7

- Legal advisor to the Director
- Legal advisor to Center elements.
- Liaison with the Chief Counsel.

CIVIL RIGHTS STAFF

ACT-9

- Equal opportunity:
  In internal FAA employment
  by FAA contractors
  by recipients of Federal assistance.
- Investigation of discriminatory practices.
- Affirmative civil rights action programs.

EXECUTIVE OFFICER

ACT-3

- Direction of administrative support services.
- Administrative guidance to program divisions.
- Supervision of assigned support staff elements.
- Direction of appraisal and evaluation program.

PERSONNEL MANAGEMENT DIVISION

ACT-10

- Administration of personnel services programs.
- Personnel security.

FINANCIAL SERVICES DIVISION

ACT-30

- Formulation, review and administration of Center budget.
- Coordinates Center financial plans for automated programs.
- Execution and maintenance of accounting systems.

LOGISTICS SERVICES DIVISION

ACT-50

- Management, operation and maintenance of Center plant facilities.
- Management of Center stock and store, receipt and issuance of supplies and material.
- Management of personal, real and industrial property, accountability, utilization, and inventory programs and procedures.
- Space and communications management.
- Procurement and contract administration services.

MANAGEMENT SERVICES DIVISION

ACT-40

- Management analysis, information systems, and paperwork management programs.
- Graphic arts, library and mail services.
- Administrative automatic data processing services.

SYSTEMS TEST AND EVALUATION DIVISION

ACT-100

- Performance of technical and operational test and evaluation of aviation-related communication, radar systems, aircraft navigation and guidance, and aircraft approach and landing systems.
- Management, operation and maintenance of assigned technical facilities and laboratories.
- Conduct of and reports on assigned test and evaluation projects.

SYSTEMS SIMULATION AND ANALYSIS DIVISION

ACT-200

- Performance of aviation related technical and operational test and evaluation programs in an analytical and simulated environment.
- Management, operation and maintenance of assigned technical facilities and laboratories.
- Conduct of and reports on assigned test and evaluation projects.

AIRCRAFT SAFETY DEVELOPMENT DIVISION

ACT-300

- Principal element within engineering and development complex for planning and managing research and development in the areas of aircraft safety development.
- Management operation and maintenance of assigned technical facilities and laboratories.
- Conduct of and reports on assigned test and evaluation projects.

AIRPORT DEVELOPMENT DIVISION

ACT-400

- Principal element within engineering and development complex for planning and managing research and development in the areas of airport development.
- Management, operation and maintenance of assigned technical facilities and laboratories.
- Conduct of and reports on assigned test and evaluation projects.

AVIATION FACILITIES DIVISION

ACT-600

- Project flight planning and aircraft operation and maintenance, airport operation, communications, control center, police, and fire, crash and rescue services.
- Physical security and investigations.

DATA ENGINEERING AND DEVELOPMENT DIVISION

ACT-700

- Performance of aviation-related technical and operational test and evaluation and automation concepts, equipment and systems.
- Manages, operates, and maintains assigned technical facilities and laboratories.
- Conduct of and reports on assigned test and evaluation projects.

GLOSSARY

Air Carrier District Offices (ACDO):

These organizations conduct those air safety programs relating to the certification, inspection, and surveillance of operations and maintenance programs and facilities of air carriers and commercial operators; certification and surveillance of air carrier airmen; surveillance of airports used for training of air carrier or commercial operator operations; and recurring certification of aircraft (in excess of 12,500 lbs.) used by air carriers or commercial operators.

Aircraft Maintenance Base (AMB):

Agency facilities performing scheduled and unscheduled aircraft and avionics maintenance of FAA aircraft.

Airport District Offices (ADO):

These offices are outlying units or extensions of regional Airports Divisions. They advise and assist public agencies and their agents with the submission of project requests for establishing, improving, equipping, and financing of airports under the Airport Development Aid Program and in obtaining surplus airport property under the Surplus Property Disposal Program, They also provide advisory services to the owners and operators of both public and private airports regarding the operation and maintenance of their airports.

Airport Traffic Control Tower (ATCT):

A terminal facility which through the use of air/ground communications, visual signaling, and other devices, provides air traffic control (ATC) services to airborne aircraft operating in the vicinity of an airport and to aircraft operating on the movement area.

Air Route Traffic Control Center (ARTCC):

A facility established to provide air traffic control service to aircraft operating on Instrument Flight Rules (IFR) flight plans within controlled airspace, and principally during the enroute phase of flight. When equipment capabilities and controller workload permit, certain advisory/assistance services may be provided to Visual Flight Rules (VFR) aircraft (Aircraft flying under visual Flight rules).

Air Traffic Representatives (ATREP):

An air traffic representative at a military facility which provides approach control service to civil aircraft.

Air Transportation Security Field Offices (ATSFO):

These offices administer and monitor FAA's civil aviation security programs designed to combat hijacking and sabotage; and maintain liaison with airlines, airport operators, government, industry, and law enforcement officials on air transportation security matters.

Airway Facilities Sector (AFS):

Airway Facilities Sectors (AFS) are major organizational elements operating in the field environment. They handle system maintenance operations and provide engineering services on a day-to-day basis under the general direction of the regional AF Division having purview. These organizations conduct a maintenance and certification program to assure the continued operation, accuracy, and reliability of all air traffic control, air navigation, communication facilities and ancillary equipment assigned to them. Sector Managers report directly to the regional Airway Facilities Division Chief.

Airway Facilities Sector Field Office (SFO):

An organizational element that is subordinate to the Airway Facilities Sector located away from the sector headquarters.It is sometimes the reporting point for one or more subordinate technical units called Airway Facilities Sector Field Office Units (SFOU).

Airway Facilities Sector Field Office Unit (SFOU):

See Airway Facilities Sector Field Office (SFO).

Airway Facilities Sector Field Unit (SFU):

A remote organizational unit directly subordinate to an Airway Facilities Sector Office but with responsibilities similar to an Airway Facilities Sector Field Office Unit.

Center Radar Approach Control (CERAP):

A combined air route traffic control center (ARTCC) and a terminal radar approach control facility (TRACON).

Combined Approach Control/International Station (CAPIS):

A combined approach control facility and international flight service station.

Combined Station/Tower (CS/T):

An air traffic control facility which combines the functions of a flight service station (FSS) and a airport traffic control tower (ATCT).

Common Instrument Flight Rules Room (CIFRR):

Provides approach control services into and out of the New York Metropolitan area.

Engineering and Manufacturing District Offices (EMDO) (Called Aircraft Engineering District Offices in Western Region (AEDO):

These organizations provide for original and supplemental airworthiness certification or approval of civil aircraft, engines, propellers, parts, and appliances including surplus military products and parts; and conduct inspection surveillance of manufacturing facilities producing civil aircraft, engines and propellers to determine compliance with prescribed safety standards.

Flight Inspection District Offices (FIDOs), Flight Inspection Field Offices (FIFOs) and Flight Inspection Groups (FIGs):

These organizations conduct in-flight inspections, and evaluations of all navigation and landing aids and certify, recertify, or deny either limited or total use of such for air navigation or landing purposes; make site surveys and determine the safety and practicability of associated flight procedures.

Flight Service Station (FSS):

Air Traffic facilities which provide pilot briefing, enroute communications and Visual Flight Rules (VFR) search and rescue services, assist lost aircraft and aircraft in emergency situations, relay ATC clearances, originate Notices to Airmen, broadcast aviation weather and NAS information, receive and process IFR flight plans and monitor radio air navigation facilities (NAVAIDS). In addition, at selected locations, FSSs provide Enroute Flight Advisory Service (Flight Watch), take weather observations, issue airport advisories, and advise Customs and Immigration of transborder flight.

Flight Standards District Office (FSDO):

These organizations have the combined functions of an Air Carrier District Office (ACDO) and General Aviation District Office (GADO).

General Aviation District Offices (GADOs):

These offices conduct those air safety programs relating to certification, inspection, and surveillance of general aviation operators, agencies, and related airmen; aircraft airworthiness (civil aircraft except those used by scheduled and supplemental air carriers and commercial operators, weighing in excess of 12,500 lbs.); air taxi operators, aerial applicators and rotocraft external load operators; and maintain surveillance of and conduct inspections of general aviation flight operations and maintenance to assure compliance with safety requirements.

International Aeronautical Telecommunications Switching Center (IATSC):

A teletypewriter switching center that connects with the international circuits.

International Field Office (IFO):

Has air carrier and general aviation responsibilities overseas.

International Flight Service Station (IFSS):

A central operations facility in the flight advisory system, manned and equipped to control aeronautical point-to-point telecommunications and air/ground telecommunications with pilots operating over international territory or waters providing flight plan following, weather information, search and rescue action, and other flight assistance operations.

Maintenance Engineering Field Offices (MEFO):

These offices are located only in the Southwest Region. They provide technical assistance and inspections to the sectors.

Radar Air Traffic Control Facility (RATCF):

An air traffic control facility, located at U.S. Navy (USN) or Marine Corps (USMC) Air Station, utilizing surveillance and, normally, precision approach radarand air/ground communications equipment to provide approach control services to aircraft arriving, departing or transiting the airspace controlled by the facility. The facility may be operated by FAA, the USN, or USMC and service may be provided to both civil and military airports. Similar radar approach control facilities are operated by the FAA, USN, USMC, and the Army.

Radar Approach Control Facility (RAPCON):

An air traffic control facility, located at a U.S. Air Force (USAF) base, utilizing surveillance and, normally, precision approach radar and air/ground communications equipment to provide approach control services to aircraft arriving, departing or transiting the airspace controlled by the facility. The facility may be operated by FAA or USAF and service may be provided to both civil and military airports. This facility is similar to an FAA TRACON (terminal radar approach control), a USN radar air traffic control facility (RATCF), and a U.S. Army radar approach control facility (ARAC).

Terminal Radar Approach Control (TRACON):

An air traffic control facility using radar and air/ground communications to provide approach control services to aircraft arriving, departing or transiting the airspace controlled by the facility. Service may be provided to both civil and military airports. A TRACON is similar to a RAPCON (USAF), RATCF (Navy) and ARAC (Army).
